General information

In principle, you can visit our website without disclosing who you are to us. We do not store the name of your Internet service provider, the website from which you are visiting us, or the name of the file you request.

Various data, including personal data, is only collected when you use one of our portals or another service if you provide your consent to such (see the chapter "Online data collection at der Grüne Punkt").

Collection, processing, use and disclosure of personal data and its purpose

Personal data means all information relating to your identity such as e.g. your name, your e-mail address or your postal address.

Generally we use your personal information to respond to your enquiry, process your order or provide you with access to special information or offers. This may make it necessary for us to pass on your data to other companies in our Group or external service providers in connection with the processing of your order. If this is necessary to conclude or fulfil a contractual agreement or if you have provided your consent, we may transfer your data to third parties (e.g. to process your order). Should data be passed on to service providers and/or affiliated companies in the processing of an order, these enterprises are also obligated to adhere to data protection regulations applicable in Germany and to abide by our instructions.

We would like to point out that we process your personal data in the whistleblower software we use to implement the Whistleblower Protection Act if you have been named as a witness in a relevant case.

Data transfers to third countries are performed in the operation of IT systems and only to the extent that a) such transfer is in principle permissible and b) the special preconditions for transfer to a third country are present, in particular the importer of the data guarantees an appropriate level of data protection in accordance with the EU standard contractual clauses for the transfer of personal data to processors in third countries. The provisions of the Federal Data Protection Act, the Telemedia Act (Telemediengesetz) and the General Data Protection Regulation serve as the foundations.

Option

We use your data to conclude, execute or terminate a contract with you. This also includes storing data on payment behaviour. We need this data in order to be able to carry out a dunning procedure, blockage and possible termination of the contractual agreement. In order to assert or defend against a claim, we may also forward your data to attorneys or debt-collection companies hired by us.

Whenever necessary, we pass personal data on to affiliated companies or external service providers (e.g. for billing and IT services) when processing orders.

Microsoft Dynamics 365 Customer Insights

This website uses Dynamics 365 Customer Insights ("Dynamics") from Microsoft Corporation, One Microsoft Way, Redmond, WA 98052-6399, USA, exclusively after your consent in the cookie banner in accordance with Art. 6 para. 1 lit. a GDPR. Further information on data protection can be found at <https://privacy.microsoft.com/de-de/privacystatement>. This enables us to show you relevant advertising based on your interests.

We also use Dynamics to send you relevant information about the company, its products, services, and events by electronic means - subject to your explicit consent in accordance with Art. 6 para. 1 lit. a GDPR or, in the case of existing customers, our legitimate interest in accordance with Art. 6 para. 1 lit. f GDPR.

We process your data until it is no longer required for these purposes, or you object to the processing or withdraw your consent.

AWStats / Standard APEX Background Tracking

We use the web analysis service AWStats of the Free Software Foundation to compile statistics on portal call-ups. The program declaration on AWStats can be called up at

<https://awstats.sourceforge.io>

The data protection declaration of the Free Software Foundation manufacturers' association is available at the link:

<https://www.fsf.org/about/free-software-foundation-privacy-policy>

At our portals which have been written with the development tool APEX, the standard APEX background tracking module is used in part to log user page calls (session tracking).

Integration of the Trusted Shops Trustbadge

The Trusted Shops Trustbadge is integrated into our portals to display our Trusted Shops seal of approval and any reviews that may have been collected, as well as to offer Trusted Shops products to customers after having ordered.

It serves to safeguard our legitimate interests, which predominate in the context of a weighing up of interests, in optimal marketing by enabling safe shopping in accordance with Art. 6 Para. 1 S. 1 lit. f GDPR. The Trustbadge and the services advertised with it are an offer from Trusted Shops GmbH, Subbelrather Str.15C, 50823 Cologne. The Trustbadge is provided by a CDN provider (Content Delivery Network) as part of order processing. Trusted Shops GmbH also authorises service providers from the USA. An adequate level of data protection is ensured. Further information on data protection at Trusted Shops GmbH can be found here: <https://www.trustedshops.de/impressum/#datenschutz>

When you call up the Trustbadge, the web server automatically saves a so-called server log file, which also contains your IP address, the date and time of the call, the amount of data transferred and the requesting provider (access data) and documents the call. Individual access data are stored in a security database for the analysis of security issues. The log files are automatically deleted no later than 90 days after creation.

Further personal data is transferred to Trusted Shops GmbH if you decide to use Trusted Shops products after completing an order or if you have already registered for use. The contractual agreement made between you and Trusted Shops applies. For this purpose, personal data is automatically collected from the order data. Whether you are already registered as a buyer for a product use is automatically checked using a neutral parameter, the email address hashed by a cryptological one-way function. The e-mail address is converted into this hash value, which cannot be decrypted for Trusted Shops, before transmission. After checking the value, the parameter is automatically deleted.

This procedure is necessary for the fulfillment of our and Trusted Shops predominant legitimate interests in the provision of the buyer protection linked to the specific order and the transactional evaluation services according to Art. 6 para. 1 sentence 1 lit. f GDPR. Further details, including how to object, can be found in the Trusted Shops data protection declaration linked above and in the Trustbadge.

More corresponding explanation you will find at TrustedShops on the website:
